

Aunt B's Place features hand crafted sculptural pieces, functional decor, wearable art, and accessories with a vintage steampunk and industrial vibe. Artist and owner Brenda Caldwell personally designs and creates each piece, so no two items are identical.

Her creations incorporate a wide variety of rather... well... *unconventional* materials. A drawer handle becomes an elegant necklace. Vacuum tubes and wire combine to create an intricate bird sculpture. Bullet casings become pocket-sized touchscreen styluses. Antique typewriter keys, light bulbs, clock works, cogs, gears, cabinet hinges, masonry nails, skeleton keys, miscellaneous metal bits, and other found objects are transformed and repurposed in delightfully unexpected ways.

NOW ALSO OFFERING HEIRLOOM PHOTO RESTORATION & PRESERVATION SERVICES!

Pricing determined by scope of work required to restore damaged images. Contact me for more information.

S WHAT IS STEAMPUNK?

Airships, goggles, propellers, steam-powered machinery, worn leather, clockworks, and rusty metal gears... Imagine a world where 19th century style meets modern technology. Welcome to the wonderful world of steampunk, an artistic and cultural movement celebrating the fusion of Victorian-era industrialism and science fiction.

The term steampunk was first coined in 1987 by author K. W. Jeter to describe a literary genre in which steam, not electricity, drove technological advancements. However, the influence for this whimsical new-meets-old reimagining of our world dates back to the 19th century and the works of such writers as H. G. Wells and Jules Verne, considered by many to be the forefathers of steampunk.
